couts and of Capt. Fisk to its command was made at so ate a day that but little time could be given for those who might wish to jent the train to make their arrangements so to do, and the emigration was consequently nuch less than it would otherwise have been. For the trainguistic of one bundred and thirty emigrants, including hirteen wemen, fifty-three wagons, at twelve pound sountain howitser and two hundred and twenty head of took, mostly ones, started from that post on the 7th of took, mostly ones, started from that post on the 7th of ally, and, under the guidance of Pierre Bottineau, truck out in a due west course, over a sountry where there was no trail, and whore no white man sed travelled, except where their reuts and that of to wernor Stovens, in 1858, would occasionally coincide, the country first travelled ever was a rich, well grassed and level prairie, afterding a good road and plenty of rater and grazing, and chequered with an abundance of sanstiral lakes.

and level prairie, afforcing a good road and plenty of grater and grazing, and choquered with an abundance of beautiful lakes.

The party were obliged to construct but three bridges, and were not delayed in consequence more than a couple of days. The prairie was level or only gently rolling until they reached Fort Union, with the exception of the Coteon de Missouri, which is very hilly, and which they were two days in crossing. They reached Fort Union—a trading poot of the American Fur Company, on the Missouri river at the mouth of hy Yellowstone, der miles from Fort Abercrombie—on the Pule of August. From Fort Union to Fort Benton, a distance of 267 miles, their met lay up the Missouri and Mik river valleys and was generally level and cany. They arrived at the latter fort on the 5th of September. From that point their protie was over Lieutenant Mullan's read. About rixty of their party stopped on the other sits of the mountains in the Frickly Pear valley, where they found gold prospects and a good place to winter. This valley is 150 miles this side of Fort Benton and along the Frickly Pear river—a tributary of the Missouri. It abounds with game. Some others of the party stopped in the Bitter Read valley.

The longest drive without water was that of Iwenty miles on this side of Sanke river, and grass was plentful all the way with the exception of a short distance along Mik river and in the Coeur of Aleen mountains. On the 6th day out from Abercomble, they killed three buffalo, and were at no time without superabulance of fresh buffalo meat, from that time until they arrived in the imsellate vicinity of Fort Senton. The number of buffalo econ along the route is estimated at from three to four mountains meet with necessioned no further trouble or ravellers. There was not on a natural lest on the whole trip, and the health of the party was excellent. That port con of the country passed over which is devoid of timber was covered with buffalo delips, which answer every pur pose for feel.

Supreme Court. SPECIAL TERM.

FINANCIAL AND COMMERCIAL. SUNDAY, Jan. 4, 1863.

The trade tables of the port of New York for the year 1862 will be completed in the course of a few days at the Custom House, and we postpone our weekly comparisons till the exact figures can be obtained. The specie export last week was \$643,038, of which \$325,038 went out in the Etna yesterday, and enter into the export account for the current year, thus leaving the total expert of specie from this port during the year 1862 at about \$50,864,392. The produce and merchandise ex-port may be set down at \$180,000,000, which added to the specie export, as above, would give an aggregate export movement of \$219,864,392. Against this, the imports, up to last night, which includes two working days in 1863, are returned at the Custom House as \$175,150,201. In tabular form the business of the year would stand some

Presumed balanco in favor of the port \$14,714,191 The estimate of the amount of American stocks sent here for sale from Europe during the past year, though generally accepted by the foreign banking houses, cannot of course be implicitly relied upon, as no data exist for arriving at an accurate estimate. It is probably rather over than un-der the true figure. At first blush the very heavy export of specie in 1862 appears to be inconsistent with the theory that the balance of trade is in our caser. But if the facts were known it would probably be found that a large proportion of the specie shipped to Europe during the past year was not sent abroad in the ordinary course of business for the payment of debts, but was shipped by timid persons here, who wished to place it in a country not visited by war. Should this have been the case, we shall find when the war ends that we are creditors of Europe to a very considerable amount, and the exchange market will be affected n a marked manner in consequence. This is a prospects of the war and of the national finances are rather calculated to increase than to diminish the fears of those who have been sending their

means to Europe for safety.

Of the prospect for the future nothing can yet be said with any degree of confidence. Everything depends upon the course of the war. The Western wheat crop is known to have fallen very considetably short of the crop of 1861; but there is still a large quantity of wheat in the hands of the farmers which would be drawn out by higher prices. Thus far we are receiving very little cotthe Mississippi and its tributaries—if we succeed in reopening them—can only be ascertained by the event itself. The orders of the rebel government volving the Southern planter and the Northern How long so suicidal and inhuman a policy can be pursued with impunity events alone can deter-mine; but we think that many months must interby the Union armies, before cotton will again come forward in quantities sufficient to affect the course of our foreign trade. Our gold and silver supply from California and Nevada Territory is likely to be larger in 1863 than in 1862; and if the government will adequately protect the treasure ships against the enterprises of British privateers, we shall receive as much as usual at this port.

Congress meets again to-morrow, and it is exject which they have been engaged in framing during the holidays. Nothing is reliably known concerning its details. The despatches which have been sent to this city from Washington purporting to give the views of the committee are unworthy of credit. There is reason to believe that on a full examination of the ground the committee have come to the conclusion that the ties of the government are so great that it would be impossible to supply them either by loans exclusively, or by the issue of legal tender paper exclusively. It may be inferred, therefore, that the policy recommended will combine the two, and that during the current year Mr. Chase will borrow and manufacture money alternately, as the state of the market and public confidence will warrant. The recent reverses which the Union arms have met with; the emancipation proclamation, which will probably add a considerable sum to the cost of the war; the general lack of confidence in the War and Navy Departments, and the unwil. linguess of the President to make changes in the Cabines, the failure of our Southern expeditions to discover and bring to market large supplies of cotton, and the gloomy aspect of affairs generally, have forced the most conservative friends of the government in this city to come reluctantly to the conclusion that, however desirable a return to sound principles of finance might be, it would be almost hopeless to attempt to negotiate a loan at present. If our armies had been successful; if new blood had been infused into the Cabinet, and the people could see their way to the close of the war within a reasonable time, a 7.30 loan of \$100.000,000 might have been disposed of here at a fair rate. But it is idle to disguise the fact that public confidence has received a shock within the past month which would prove fatal at present to snancial negotiations. This fact, which is now rejuctantly admitted everywhere, will give addi-tional power to the Western demand for more currency, and, so far as can now be judged, will leave Congress no choice whatever as te a financial policy. The event is deeply, very deeply, to be regretted. But, under present sircumstances, the financial problem admits of but one solution. It is understood that Mr. Chase adheres to his bank scheme, and regards it as adequate to meet the emergency. It is clear, however, that if no more bank currency be manufactured under this scheme than the interests of bankers will suggest, the plan will not supply the Treasury with the money which is required; and, on the other hand, should the Treasury obtain the amounts it needs through the intermediary of new banks, it is equally ebthe informediary of new banks, it is equally obvious that the issues of such banks will be merely into amable paper with all the defects of government issues, and without their security. That this is no time a establish new banks, with a view to a legitimate banks a business, is too clear for argument. A few wealthy speculators would, no doubt, avail themselves of any orivilege which Congress might grant to issue irredectable paper based on the security of bonds which are alwayly selling at 70 cents on the dollar for gold. But the first character in the Russian Navy, is stopping as the first eventually as the first posture in the first posture in the recent trip to Forty case shorter, and a first very high stems are the recent trip to Forty case shorter, and a first very high stems are the recent trip to Forty case shorter, and a first very high stems are the recent trip to Forty case shorter in the recent trip to Forty case of the class.

Short a shorter is no recent trip to Forty case of the class.

Short a shorter is no reason to be few that a sofficient number of such a special to satisfact a sofficient number of such a soften of the shorter is no reason to be few that a sofficient number of such a soften of the soften number of such appears to be forther owned to the soften of the such appears to be few that a sofficient number of such appears to be forther owned to the soften number of such appears to be few that a sofficient number of such appears to be forther owned to the soften number of such appears to su

banks organized on Mr. Chase's plan, of the imwould be brganized to subserve the purpose of
the Secretary, and of the delays which its adoption would involve, the prevailing opinion appears
to be that direct issues of government paper will
be preferred to issues of paper issued by individuals and only indirectly connected with govern-

ment.

The week closed on an easy money market. Some of the banks are free lenders, on first class securities, at 5 per cent. Other lenders decline to part with their means under six, and the activity of business on the Stock Exchange enables them to get this rate. Debt certificates sell at 96½ a ½. Demand notes, which sold last week as high as 120 closed vesterday at 120½. It appears to be

Demand notes, which sold last week as high as 130, closed yesterday at 129%. It appears to be the received opinion that government will be compelled to keep money easy at the great financial centres in order to negotiate loans.

Exchange closed yesterday very firmly at 147% for sterling bills (bankers'). The demand for bills from the importing trade is comparatively light; but many merchants, especially foreign houses, continue to hoard exchange as a protection against the depreciation of the currency. Gold sold on Friday last at 135, and after opening yesterday at 133%, closed at 134%. The United terday at 133%, closed at 134%. The United States government and the various State govern-ments are disbursing large quantities of gold in payment of interest. The California steamer likewise brought a remittance yesterday which was not expected. Under these circumstances a temporary weakness in the market would not sur

prise operators. The following table shows the course stock market for the past week and month:-

N. Y. Central. 1023 Reading. 764 Brie 64 8 Brie preferred. 917 Michigan Central. 894 Michigan South 9. 395 South guarant'd 83 Illimois Central. 785 Calena. 807 Rock Island. 794 Foledo. 673

and we have to report a large increase of public speculation. As the issue of \$200,000,000 of legal tender notes led to an advance of 25 a 100 per cent in stocks last summer and last autumn, it is inferred that another increase of a like or even a greater amount, will now be followed by a fur ther corresponding upward movement. South unlimited issues of paper money have led to an extraordinary advance in all securities. Railway stocks which used to be sold at 12 a 20 per cent now command 100 in the currency of the rebel confederacy. Bank stocks worth 80 a 100 in Confederate notes. Speculators argue that what has happened in the rebel States will happen here; that excessive issues of paper, forced upon us by the exigencies of the crisis, will produce their inevitable results in the appreciation of all securi-ties not connected with or dependent on the government, and that a time will come when every man of property will desire to invest his means in something else than currency. These views have led to so general an absorption of railway bonds that none of the old first class bonds can be bought at a price which will yield the hold bonds which are still at low figures are the issues of the reorganized Pittsburg, Fort Wayne and recent creation, have not yet found a resting place, and are still in excess in our market. Railcent since Christmas day. Hence last evening there was a pretty general attempt to realize profits, which led to a decline of 1 a 12/2 per cent from the current prices of Friday morning. Most of the great cliques which were formed a month ago to put up particular stocks have sold out to the public at a profit. Under ordinary circum, es some uncertainty might be felt with regard to the course of the market. But the prospect of new issues of paper money renders speculators unwilling to allow their means to depreciate in bank, and prompts every man who has a thou-and dol which may advance as the currency declines in

value.

The chief point of anxiety just now in railway matters relates to the Erie statement, which is shortly to be made public. Nothing has yet been ascertained either with regard to its tenor or the date of its appearance. It is pretty generally un' derstood, however, that it will show that the road earned in 1862: first, the interest on its entire bonded debt; secondly, seven per cent on the pro-ferred stock; and thirdly, ten per cent on the common stock. The latter amount, say \$1,100,000, has been disposed of in the payment of scrip to the holders of overdue mortgage coupons. The road has now no floating debt, and should the earnings of 1863 equal those of 1862 the holders of old Brie will divide something like ten per cent and the old stock will probably rule twelve month, hence as much above the preferred as New Jersey Central stock rules above the bonds of the same concern. New York Central has been rather active, in consequence, as is supposed, of pur chases by bankers and others in the interior About seven months ago a number of bankers and capitalists, foreseeing the depreciation of the currency, invested their means in New York Centrai in preference to gold. The stock rose in con-sequence from 90 to 107. At that figure it stopped the demand for currency at the West, and the inthe demand for currency at the west, and the in-creased price of money having induced most of these investors to sell out. The course of the stock during the past week leads to the belief that these parties are again putting their money into it. In active speculative seasons like the present but little regard is paid to intrinsic values in the pur-chase of stocks. Thus Cleveland and Pittsburg, whose managers have ever disclaimed faith in its value, has advanced twelve per cent in about tweek, while Bock Island, which may fairly be con sidered a six to seven per cent dividend paying stock, has barely risen four. Cleveland and Toledowhich has never been able to pay off its floating debt, and which pays an occasional dividend with many throes, has risen to the neighborhood of 80, while Southern guaranteed—a ten per cent stock, issued by a company that is carning a surplus over and above the ten per centis selling at 86%. Pacific Mail dropped to 133 early last week, on the seizure of the Ariel by the British pirate Alabama, but recovered to 136% a 137 on the arrival of the Ocean Queen with specie yesterday. The Harlem stocks have been active lately, without any good reason that is publicly known. In all probability they have been the tools of speculators, and will decline as rapidly as they advanced. Michigan Central remains dull at the recent advance. Border State stocks have been successfully manipulated by speculators. Missouris rose seven per cent in a single day, spparently on the prospect of emancipation, and Tennessees and North Carolinas have been equally
